innovative projects that turn technology into reality

## we're hiring!

### WE ARE CURRENTLY SEARCHING FOR BUSINESS AND TECHNOLOGY SUPERSTARS TO JOIN OUR INTERN PROGRAM.

Ideas Siero Labs is an incubator for growing technology startups and businesses. We are located in Scotts Valley CA, just over the hill from the technology hub of Silicon Valley. We are currently working on several projects including Artists.com, which is a website to promote and sell giclee prints of artists worldwide. We are also working on the development of the website Romance.com, as well as a software tool to help writers produce their content more efficiently. We have several other ideas for projects that are still in the beginning stages.

We are seeking interns to work with us and help bring ideas to life. We welcome engineers, programmers, hackers, writers, artists and videographers who are eager to learn and share their knowledge. We have a small but great team, and take pride in the type of startup culture we live by. Below are several areas in which we are interested in exploring:

### Artificial Intelligence

GPU Accelerated software for Video Facial Tracking with Emotion Recognition, Voice Recognition/Synthesis Technology, Security Applications and more.

### Electrical Engineering

Open Source Smart Building Technology and Computer Aided Design Tools.

### Business Development

Business and Marketing strategic planning for Artists, and Online-Real Estate, emphasizing viral strategies.

### Tool Development

GoLang / Node.js / JQuery / Devops / Cordova. Web and mobile tools for writers and game developers, art promotion, web-interaction & real estate products.
